### About

I am adept at grasping new concepts and finding innovative ways to implement them, which is why I excel as a programmer. I have a knack for collaborating with groups, as I believe that multiple individuals or teams can offer various methods to enhance and improve a project I have good communication skills and enjoy working with people. I am adept at seeing problems from new perspectives and finding solutions. I am a computer science student and I have learned Python programming language (I love Python) from the beginning. I have a lot of practice projects at hand, but the most organized ones I upload to GitHub. You can find them at <https://github.com/sismolla>
